

Group Capital Resources and Liquidity

Treasury Management

The Group's treasury function sets financial risk management policies in accordance with policies and procedures that are approved by the Executive Directors, and which are also subject to periodic review by the Group's internal audit function. The Group's treasury policies are designed to mitigate the impact of fluctuations in interest rates and exchange rates on the Group's overall financial position and to minimise the Group's financial risks. The Group's treasury function operates as a centralised service for managing financial risks, including interest rate and foreign exchange risks, and for providing cost-efficient funding to the Group and its companies. It manages the majority of the Group's funding needs, interest rate, foreign currency and credit risk exposures. The Group uses interest rate and foreign currency swaps and forward contracts as appropriate for risk management purposes only, for hedging transactions and for managing the Group's assets and liabilities' exposure to interest rate and foreign exchange rate fluctuations. It is the Group's policy not to enter into derivative transactions for speculative purposes. It is also the Group's policy not to invest liquidity in financial products, including hedge funds or similar vehicles, with significant underlying leverage or derivative exposure.

Cash management and funding

The Group operates a central cash management system for all of its subsidiaries. In general, financing is raised mainly in the form of bank borrowings to meet funding requirements of the operating subsidiaries of the Group. The Group regularly and closely monitors its overall debt position and reviews its funding costs and maturity profile to facilitate refinancing.

Interest rate exposure

The Group manages its interest rate exposure with a focus on reducing the Group's overall cost of debt and exposure to changes in interest rates. When considered appropriate, the Group uses derivatives such as interest rate swaps and forward rate agreements to manage its interest rate exposure. The Group is exposed to interest rate changes that affect Hong Kong dollar borrowings which are at floating rates.

Foreign currency exposure

The Group runs telecommunications operations principally in Hong Kong, with transactions denominated in Hong Kong dollars. The Group generally endeavours to establish a natural hedge for debt financing with an appropriate level of borrowings in those same currencies. The Group is exposed to other currency movements, primarily in terms of certain trade receivables or payables and bank deposits denominated in United States dollars, Macau Patacas, Renminbi, Euros and British pounds.

Credit exposure

The Group's holdings of surplus funds with financial institutions expose the Group to credit risk of counterparties. The Group controls its credit risk to non-performance by its counterparties through monitoring their equity share price movements and credit ratings as well as setting approved counterparty credit limits that are regularly reviewed.

The Group is also exposed to counterparties credit risk from its operating activities, such risks are continuously monitored by the management.
